PROFESSIONAL SUMMARY

Motivated Electrical Engineering undergraduate at Thapar Institute of Engineering and Technology with a strong complementary skill set in Full-Stack Web3 development, decentralised application architecture, and blockchain-based systems. Demonstrated ability to design and ship production-grade platforms — including a Stellar-network certificate-issuance dApp — combining hardware-domain analytical thinking with modern software engineering practices. Seeking opportunities to leverage cross-disciplinary expertise in electrical systems, Python automation, Docker-based DevOps, and Web3 development to deliver impactful solutions in a fast-paced engineering or technology environment.

EDUCATION

B.Tech in Electrical Engineering

Thapar Institute of Engineering and Technology, Patiala | Expected 2029

- Relevant coursework: Circuit Theory, Power Systems, Signals & Systems, Microprocessors, Engineering Mathematics.
- Active participant in technical clubs and inter-institutional hackathons.

PROJECTS

TrustCert — Blockchain Certificate Issuance Platform

Full-Stack Web3 Developer | trustcert-beta.vercel.app | 2024 – Present

- Architected and deployed an end-to-end decentralised certificate issuance and verification platform on the Stellar blockchain network, eliminating the need for centralised certificate authorities.
- Designed smart-contract-equivalent Stellar operations for tamper-proof credential storage, enabling instant on-chain verification by third parties.
- Built a responsive Next.js/React front-end with wallet integration, reducing certificate issuance time by over 80% compared to traditional paper-based workflows.
- Containerised the application using Docker, ensuring consistent deployment across environments; hosted on Vercel with CI/CD pipelines for zero-downtime releases.
- Demonstrated leadership by coordinating project milestones, code reviews, and stakeholder demos across a cross-functional team.

SKILLS

Technical	Python · Full-Stack Web Development (React, Next.js, Node.js) · Web3 / Blockchain (Stellar Network, Smart Contracts) · Linux · Docker · Git / GitHub · REST APIs · HTML5 / CSS3 / JavaScript
Soft Skills	Leadership · Event Management · Problem Solving · Cross-functional Collaboration · Technical Communication
Languages	English (Professional) · Hindi (Native)

ADDITIONAL INFORMATION

- Open-source contributor; actively maintains public repositories on GitHub covering Python automation scripts and Web3 tooling.
- Experienced event organiser — led logistics and coordination for college-level technical fests and workshops with 100+ attendees.
- Self-directed learner: completed online specialisations in blockchain development, Docker, and Linux system administration.
- Available for freelance Web3 / Full-Stack development projects and open to internship opportunities in electrical engineering.
